Introduction

Chemistry is central to the sciences, the understanding of the physical world, and the study of biological systems. Chemistry is the science of transformations and energetics of materials at the molecular level. Chemistry has applications from the nanoscale to the macroscopic. Chemists use their training and creativity to improve the quality of life by creating new drugs, inventing new materials, improving the efficiency of processes, developing new energy systems, and providing critical data for policy decisions. A chemistry degree provides a solid foundation to pursue a range of career directions spanning fundamental research, applied research tied closely to engineering or health professions, chemical education, and technical areas in business and law. Virginia Tech offers two course curricula leading to undergraduate degrees in Chemistry, the Bachelor of Science (B.S.) and the Bachelor of Arts (B.A.):

THE B.S. CURRICULUM

The curriculum leading to the B.S. degree in chemistry prepares students for careers as professional chemists in industry or government or to continue their academic training in graduate study in chemistry or related fields. It is also suitable to prepare for pre-professional school or high school teaching. The B.S. degree meets the guidelines of the American Chemical Society (ACS) for an ACS-certified degree in chemistry.

THE B.A. CURRICULUM

The B.A. curriculum allows greater flexibility to include more elective courses for students who wish to tailor a program to their individual goals, including pursuing a double major. It is also suitable for students interested in pursuing graduate study in an area related to chemistry, professional school, high school teaching with multiple endorsements, or business. In deciding to start either the B.A. or the B.S. degree, one major difference for freshman year is the different math courses in the two curricula. Due to the greater math requirements of the B.S., it is easier to start on the B.S. and switch to the B.A. rather than vice versa.

This handbook outlines the requirements to complete the Chemistry B.S. and B.A. degrees and provides answers to common questions that students have about choosing and completing a degree at Virginia Tech. There are two important notes to the information presented here: (1) the Virginia Tech Undergraduate Catalog is the official reference source on academic policies, and (2) this handbook includes the most current checksheets, however degree requirements can change and you should obtain the appropriate checksheet from the Chemistry Department website for your graduation term.

Thank you for choosing chemistry! For more information contact

Minimum grade requirements for Progress Towards Degree

For students who start at Virginia Tech as chemistry majors

General Chemistry for Chemistry Majors CHEM 1055-1056

First year chemistry majors are scheduled to take CHEM 1055-1056, *General Chemistry for Majors* lecture sequence, and the corresponding labs, CHEM 1065-1066. All chemistry majors must earn a “C” (2.0) or better in CHEM 1055 in the fall to take CHEM 1056 in the spring.

If a chemistry major fails to earn a “C” (2.0) or better in CHEM 1055, he or she must either retake this class (and earn the minimum grade) **or** take CHEM 1035-1036, *General Chemistry*, to remain in good standing for a chemistry degree. If the chemistry major elects to take CHEM 1035-1036, a minimum grade of “B” (3.0) is required in both in order to enroll in CHEM 2565 and progress towards a chemistry degree.

Principles of Organic Chemistry CHEM 2565-2566

All chemistry (B.A. and B.S.) majors take the *Principles of Organic Chemistry* lecture sequence, CHEM 2565-2566. Chemistry majors must earn a “C” (2.0) or better in CHEM 1056 to take CHEM 2565. Chemistry majors must earn a “C” (2.0) or better in CHEM 2565.

Substituting “Non-Majors” credits—for students who transfer in or start at Virginia Tech as a major other than Chemistry

General Chemistry CHEM 1035-1036

Non-chemistry majors at Virginia Tech who have taken CHEM 1035-1036 and wish to transfer into chemistry to pursue a B.A or a B.S. must have earned a “B” (2.0) or better in each course to count them as *General Chemistry for Chemistry Majors* lectures CHEM 1055-1056.

There is no minimum grade requirement for non-chemistry majors to count credit for *General Chemistry* labs CHEM 1045-1046 as *General Chemistry for Chemistry Majors* labs CHEM 1065-1066.

Non-chemistry majors at Virginia Tech who have taken CHEM 2535 and wish to transfer into chemistry to pursue a B.A. or a B.S. must have earned a “B” (3.0) or better in this course to count it as *Principles of Organic Chemistry* lecture CHEM 2565.

Tentative as of 6/14/18

**College of Science
Department of Chemistry

| | () _____ () _____ () _____ () _____ | |
| | () _____ () _____ () _____ () _____ | |
| PART 2: College and department credit hour requirement: | | 96 credits |

¹ Minimum Grade Requirement: Chemistry majors must earn a grade of “C” (2.0) or better in CHEM 1055, 1056, and 2565.

- If a chemistry major fails to earn a “C” (2.0) or better in CHEM 1055, the student must either retake this class (and earn the minimum grade) **or** take CHEM 1035-1036, *General Chemistry*, to remain in good standing for a chemistry degree. If the chemistry major elects to take CHEM 1035-1036, a minimum grade of “B” (3.0) is required in both in order to enroll in CHEM 2565 and progress towards the B.S. degree.
- If a chemistry major fails to earn a “C” (2.0) or better in CHEM 2565, the student must either retake this class (and earn the minimum grade) **or** take CHEM 2535, *Organic Chemistry*, to remain in good standing for a chemistry degree. If the chemistry major elects to take CHEM 2535, a minimum grade of “B” (3.0) is required to count CHEM 2535 as CHEM 2565 for the CHEM degree.

² This checksheet has no hidden prerequisites, although some of the courses listed are prerequisites for other courses. Please see your advisor or consult the Undergraduate Course Catalog for more information. Please note: Chemistry majors are expected to be “calculus ready” upon the start of their curriculum.

³ Credit hours and GPA requirements: Graduation requires completion of a minimum of 120 credit hours with a GPA of 2.0 or greater for all hours attempted. In addition, students must have an in-major GPA of 2.0 or greater counting all required chemistry courses and chemistry electives. The in-major CHEM GPA excludes Introduction to Chemistry (CHEM 1015, 1016, 1025, 1026), Chemistry First-Year Experience (CHEM 1004), and Chemistry Problem Solving Skills. No more than 6 hours of CHEM 2974, 4974, and 4994 will be included in a student’s in-major GPA.

⁴ Effective Spring 2015, chemistry majors must maintain an in-major GPA of 2.0. If a chemistry major fails to meet this requirement for one academic term the student will be placed on Policy 91 (Satisfactory Progress Towards Degree) probation. Failure to meet the standard for two consecutive semesters will result in a Policy 91 suspension.

⁵ Foreign requirement: Students who did not successfully complete at least two years of a single foreign language or sign language during high school must successfully complete six semester hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement do not count toward the hours required for graduation. Please consult the Undergraduate Catalog of details.

⁶ For “satisfactory progress towards degree,” these courses and their prerequisites must be completed by the time the student has attempted 72 hours.

⁷ Fulfilled by CHEM 4014 and CHEM 3626.

⁸ Fulfilled by PHYS 2305 and PHYS 2306.

⁹ Fulfilled by MATH 1225 and MATH 1226.

¹⁰ Prior credit for CHEM 1045 may be substituted for CHEM 1065.

¹¹ Prior credit for CHEM 1046 may be substituted for CHEM 1066.

¹² Effective Fall 2014, if a student has taken CHEM 2535 prior to adding a degree in chemistry, a minimum grade of “B” (3.0) or better is required in order to substitute CHEM 2535 as CHEM 2565.

¹³ Since CHEM 2545-2546 does not satisfy the prerequisite for CHEM 2556 (due to training on specific instrumentation), if a student adds a CHEM BS degree after completing CHEM 2545-2546, two or more credits of CHEM 4994 may substitute for CHEM 2556 to meet the requirement of 400 lab hours beyond general chemistry for an ACS-approved degree.

¹⁴ Any three-credit STAT or CS course, with the exceptions of CS 1004 and CS 1xxx, may satisfy STAT/CS requirement for chemistry degree.

¹⁵ SBIO 3444 or SBIO 4424 (cross-listed with CHEM 4424) may count as polymer chemistry elective **or** upper-level restricted chemistry elective.

¹⁶ A biochemistry or chemical engineering student should not double-count coursework required for that major towards the chemistry upper-level elective.

Bachelor of Science (B.S.) in Chemistry
RECOMMENDED SCHEDULE

First Year		Fall	Spring
CHEM 1055, 1056	General Chemistry for Majors	4	4

96 credits

¹ **MINIMUM GRADE REQUIREMENT:** Chemistry majors must earn a grade of “C” (2.0) or better in CHEM 1055, 1056, and 2565.

- If a chemistry major fails to earn a “C” (2.0) or better in CHEM 1055, the student must either retake this class (and earn the minimum grade) **or** take CHEM 1035-1036, *General Chemistry*, to remain in good standing for a chemistry degree. If the chemistry major elects to take CHEM 1035-1036, a minimum grade of “B” (3.0) is required in both in order to enroll in CHEM 2565 and progress towards the **B.A.** degree.
- If a chemistry major fails to earn a “C” (2.0) or better in CHEM 2565, the student must either retake this class (and earn the minimum grade) **or** take CHEM 2535, *Organic Chemistry*, to remain in good standing for a chemistry degree. If the chemistry major elects to take CHEM 2535, a minimum grade of “B” (3.0) is required to count CHEM 2535 as CHEM 2565 for the CHEM degree.

² This checksheet has no hidden prerequisites, although some of the courses listed are prerequisites for other courses. The checksheet for 2020 will be approved by the University Registrar in 2018. Please see your advisor or consult the Undergraduate Course Catalog for more information. Please note: Chemistry majors are expected to be “calculus ready” upon the start of their curriculum.

³ **Credit hours and GPA requirements:** Graduation requires completion of a minimum of 120 credit hours with a GPA of 2.0 or greater for all hours attempted. In addition, students must have an in-major GPA of 2.0 or greater counting all required chemistry courses and chemistry electives. The in-major CHEM GPA excludes Introduction to Chemistry (CHEM 1015, 1016, 1025, 1026), Chemistry First-Year Experience, and Chemical Problem Solving Skills. No more than 6 hours of CHEM 2974, 4974, and 4994 will be included in a student’s in-major GPA.

⁴ Effective Spring 2015, chemistry majors must maintain an in-major GPA of 2.0. If a chemistry major fails to meet this requirement for one academic term the student will be placed on Policy 91 (Satisfactory Progress Towards Degree) probation. Failure to meet the standard for two consecutive semesters will result in a Policy 91 suspension.

⁵ Foreign Language Requirement: Students who did not successfully complete at least two years of a single foreign language or sign language during high school must successfully complete six semester hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement do not count toward the hours required for graduation. Please consult the Undergraduate Catalog of details.

⁶ For “satisfactory progress towards degree,” these courses and their prerequisites must be completed by the time the student has attempted 72 hours.

⁷ CHEM 4014 satisfies part of the chemistry ViEWS (Visual Expression, Writing and Speaking) requirement. Chemistry B.A. majors may take three credits of Undergraduate Research, CHEM 4994(H), and make a poster presentation to satisfy the remaining ViEWS requirement within chemistry. Other options for satisfying ViEWS are pursuing a second major, taking ENGL 3764 Technical Writing, and taking COMM 2004 Public Speaking.

⁸ Fulfilled by PHYS 2205, 2206, 2215, and 2215 or by PHYS 2305-2306.

⁹ Fulfilled by MATH 1025-1026 or by MATH 1225-1226.

¹⁰ Prior credit for CHEM 1045 may be substituted for CHEM 1065.

¹¹ Prior credit for CHEM 1046 may be substituted for CHEM 1066.

¹² Effective Fall 2014, if a student has taken CHEM 2535 prior to adding a degree in chemistry, a minimum grade of “B” (3.0) or better is required in order to substitute CHEM 2535 as CHEM 2565.

¹³ CHEM 3615 may be substituted for CHEM 4615.

¹⁴ MATH 1225 may be substituted for MATH 1025.

¹⁵ MATH 1226 (MATH 1225 prerequisite) may be substituted for MATH 1026.

¹⁶ MATH 2204 (MATH 1226 prerequisite) may be substituted for MATH 2024.

¹⁷ PHYS 2305 (MATH 1205 prerequisite) may be substituted for PHYS 2205 and PHYS 2215.

¹⁸ PHYS 2306 (MATH 1206 prerequisite) may be substituted for PHYS 2206 and PHYS 2216.

¹⁹ Any three-credit STAT or CS course, with the exception of CS 1004, may satisfy STAT/CS requirement for chemistry degree.

²⁰ SBIO 3444 may be counted towards upper-level CHEM electives.

²¹ A biochemistry or chemical engineering student should not double-count coursework required for that major towards the chemistry upper-level elective.

CHEMISTRY MINOR CHECKSHEET**

**For students graduating in calendar year 2020
The Minor in Chemistry requires completion of 22 credit hours**

I. Required Courses (19 hours)

CHEM 1035 ¹ -1036 ² General Chemistry	(3) _____	(3) _____
CHEM 1045 ³ -1046 ⁴ General Chemistry Labs	(1) _____	(1) _____
CHEM 2535-2536 Organic Chemistry	(3) _____	(3) _____
CHEM 2545-2546 Organic Chemistry Labs	(1) _____	(1) _____
CHEM 4615 Physical Chemistry for Life Sciences ⁵	(3) _____	

(Additional prerequisites: MATH 2015, PHYS 2206)

II. Elective course (3 hours)

(3) _____

Choose one course from this list:

BCHM 3114 Biochem for Biotech
or BCHM 4115 General Biochemistry
or CHEM 2114 Analytical Chemistry*
or CHEM 2154 Analytical Chemistry for CHEM majors*
or CHEM 2424 Descriptive Inorganic Chemistry*
or CHEM/SBIO 4424 Polysaccharide Chemistry
or CHEM 4514 Green Chemistry
or CHEM 4534 Organic Chemistry of Polymers
or CHEM 4554 Drug Chemistry
or CHEM 4616 Physical Chemistry for Life Sciences
(Additional prerequisite: MATH 2016)
or CHEM 4634 Polymer and Surface Chemistry
or CHEM/CSES/ENSC 4734 Environmental Soil Chemistry
(Additional prerequisites: CSES 3114, CSES 3124, CHEM 2114 or instructor approval)
or CHEM 4994 Undergraduate Research (3 credits)
(Requires permission of faculty research advisor and undergraduate research eligibility requirements)
or SBIO 3444 Sustainable Biomaterials & Bioenergy

III. Total Credits Required

A minimum of 22 credit hours in chemistry courses must be completed. *Students are required to complete 6 credit hours of 3000-4000 level courses.

IV. Minimum GPA

All courses used to fulfill the minor will count toward the minor GPA, and the student's overall GPA for these courses must be a 2.0 or higher.

Notes:

Acceptable substitutions are as follows:

¹ CHEM 1055 or CHEM 1055H may be substituted for CHEM 1035.

² CHEM 1056 or CHEM 1056H may be substituted for CHEM 1036.

³ CHEM 1065 may be substituted for CHEM 1045.

⁴ CHEM 1066 may be substituted for CHEM 1046.

⁵ CHEM 3615 (Pre: CHEM 1036 OR 1056 OR 1056H; PHYS 2306; and MATH 1205, 1206 & 2224) may be substituted for CHEM 4615.

IMPORTANT WAYPOINTS TO GRADUATION

Freshman year

- attend Orientation, choose math sequence
- attend advising sessions (Fall, Spring) and meet your academic advisor (Spring)

Sophomore year

- choose B.A. or B.S. organic lab sequence.

Beginning of Junior Year

- Download degree checksheet for your graduation year
- Apply for Degree on Hokie SPA
- Request DARS Report on Hokie SPA and review with your advisor

End of Junior Year

- add any minors or second majors before being within 30 credits of graduation
- Begin making hotel arrangements for out-of-town guests to attend graduation

Beginning of Senior Year

- Request a new DARS Report on Hokie SPA and review with your advisor

Senior Year (graduation semester)

- Request a new DARS Report on Hokie SPA and review with your advisor

Senior Year (2 months before Graduation)

- Review <http://www.vt.edu/commencement> for commencement dates, times and locations
- Visit Bookstore to purchase cap and gown, announcements, etc.

IMPORTANT EVENTS EACH SEMESTER

End of week 1	last day to add classes
End of week 6	last day to drop classes
Tuesday of week 9	course request opens for the next semester
Tuesday of week 10	course request closes for the next semester
Monday of week 14	Drop/Add opens for the next semester
Wednesday of week 15	last day to apply late withdrawal policy
Wednesday of week 15	end of classes
Thursday of week 15	reading day
Friday of week 15	final exams begin

!!! Check the calendar on the Registrar's website (<http://www.registrar.vt.edu>) for exact dates each semester.

Advising

ADVISORS

As future colleagues, the Chemistry Faculty wants and expects to know every chemistry major personally. You should, as you move through the program, make an effort to meet and know your professors; they are available for help and guidance. A complete and current faculty listing is found on the department website (www.chem.vt.edu). In addition, in their second semester at Virginia Tech, all undergraduate chemistry majors are assigned to a faculty member who serves as their permanent academic advisor. Students may schedule appointments directly with their advisors whenever questions or issues arise. Additionally, it is the student's responsibility to contact their advisor during course request for each upcoming semester. For "emergency" advice when the advisor cannot be located, students should feel free to contact any other advisor from the list below:

Dr. Patricia Amateis	109F Davidson Hall	231-6629*	pamateis@vt.edu
Dr. Shamindri Arachchige	109C Davidson Hall	231-4878	arachsm@vt.edu
Dr. Michael Berg	109A Davidson Hall	231-6837	bergm@vt.edu
Dr. Maggie Bump	109D Davidson Hall	231-4675	mbump@vt.edu
Dr. Jeannine Eddleton	117A Davidson Hall	231-8228	jeddleto@vt.edu
Dr. Joe Merola	3109 Hahn Hall South	231-4510	jmerola@vt.edu
Dr. Amanda Morris	480B Davidson Hall	231-5585	ajmorris@vt.edu
Dr. John Morris	1101 Hahn Hall South	231-2472	jrmorris@vt.edu
Dr. Brian Tissue	1105 Hahn Hall South	231-3786	tissue@vt.edu
Dr. Gordon Yee	2103 Hahn Hall South	231-3090	gyee@vt.edu

In addition to your assigned academic advisor, the Department provides advisors for special programs:

Freshman Advising	Dr. Patricia Amateis and Dr. Jeannine Eddleton
Transfer Student Advising	Dr. Patricia Amateis and Dr. Gordon Yee
Career Advisor**	Dr. Gordon Yee
Honors Advisors	Dr. Patricia Amateis and Dr. Gordon Yee
Pre-Med, Dental, and Veterinary	Dr. Michael Berg
Teacher Certification	Dr. Jeannine Eddleton

*All advisors' telephone numbers are area code (540).

**All chemistry majors should interact at least once a year with Dr. Yee. However, it is especially critical that rising juniors and seniors discuss their goals and aspirations early in the Fall Semester. Successfully finding the right position after graduation requires proper planning and a coordinated campaign.

A final note on advising: Advice is just that - advice to you to help you make decisions. Your advisor will provide advice on what he or she thinks will serve you best. Our advisors have been through what you are going through so listen to them and then make decisions that are best for you. You will find that life is a journey full of expected and unexpected curves with many different paths - all different and none of them right or wrong.

PROGRAM OPTIONS FOR CHEMISTRY MAJORS

CHEMISTRY TEACHER CERTIFICATION

The teacher certification advisor for chemistry majors is Dr. Jeannine Eddleton. Dr. Eddleton's office is in 117A Davidson, her email address is jeddleto@vt.edu, and her phone number is (540) 231-8228.

Students wishing to become high school chemistry teachers should pursue a B.A. degree in chemistry and then enter the fifth-year secondary science education licensure program offered by the School of Education:

<http://www.soe.vt.edu/scied>

OFFICE OF HEALTH PROFESSIONS ADVISING

Formerly housed in the office of University Honors in Hillcrest Hall, and for many years referred to as the pre-med and pre-dental program, pre-health advising not only has a new name, but also new leadership. The Department of Career Services (<http://www.career.vt.edu>), a department within the Division of Student Affairs (<http://www.dsa.vt.edu>), is now home to Virginia Tech's Office of Health Professions Advising. The Office of Health Professions Advising is in the Smith Career Services building.

The *pre-med, pre-dental, and pre-vet advisor* for chemistry majors is Dr. Mike Berg.

Students who wish to go to medical or dental school will meet minimum admission requirements for most schools by adding freshman biology to either (B.A. or B.S.) Chemistry degree program. However, most students take additional biology and biochemistry courses. For an orderly progression through these courses, it is important that pre-med and pre-dental students take biology in their freshman year.

The next page shows a suggested program of study for chemistry students who plan to go to medical school. A pre-dentistry program of study would be very similar.

CHEMISTRY B.A. for PRE-MEDICAL PROFESSIONAL Students

SUGGESTED COURSE SEQUENCE

First Year		Fall	Spring
CHEM 1055, 1056	General Chemistry for Chem Majors	4	4
CHEM 1065, 1066	General Chemistry for Chem Majors Lab	1	1
CHEM 1004	Chemistry First Year Experience	1	-
BIOL 1105, 1106	Principles of Biology	3	3
BIOL 1115, 1116	Principles of Biology Lab	1	1
ENGL 1105, 1106	First-Year Writing	3	3
MATH 1025	Elementary Calculus	3	-
MATH 1026	Elementary Calculus	-	3
	Semester Total	16	15
Second Year			
CHEM 2565, 2566	Principles of Organic Chemistry	3	3
CHEM 2545, 2546	Organic Chemistry Lab	1	1
BIOL 2604	General Microbiology	3	-
BIOL 2004	Genetics	-	3

MATH 2024	Intermediate Calculus	3	-
PHYS 2205, 2206	General Physics	3	3
PHYS 2215, 2216	General Physics Lab	1	1
PSYC 1004	Introductory Psychology	-	3
SOC 1004	Introductory Sociology	3	-
STAT 3615	Biological Statistics	-	3
	Semester Total	17	17
Third Year			
CHEM 2154	Analytical Chemistry for Chem Majors	4	-
CHEM 2164	Analytical Chemistry for Chem Majors Lab	1	-
CHEM 2424	Descriptive Inorganic Chemistry	-	3
CHEM 4014	Survey of Chemical Literature	-	1
CHEM 4554	Drug Chemistry	-	3
BCHM 4115, 4116	General Biochemistry	4	3
	Electives	6	5
	Semester Total	15	15
Fourth Year			
CHEM 4615, 4616	Physical Chemistry for Life Sciences	3	3
CHEM 3625	Physical Chemistry Lab	-	1
	Electives	9	9
	Semester Total	12	13

Students desiring a second major in biochemistry should refer to the biochemistry department website for updated information (<http://www.biochem.vt.edu/undergraduate/index.html>).

Other electives should be chosen after consultation with the Office of Health Professions Advising. Students interested in pharmacy school can follow this sequence being sure to take other required electives, e.g., microeconomics and public speaking, per admission requirements of the pharmacy school(s) of interest.

Useful Information from the Undergraduate Catalog

The following information is a general summary of many academic policies. **Refer to the complete text in the Undergraduate Course Catalog (<http://www.undergradcatalog.registrar.vt.edu/>) for full details.**

ACADEMIC ELIGIBILITY POLICY

A GPA of 2.0 (a C average) overall and in-major is required for graduation. Any time your overall GPA falls below 2.0 you are placed on academic probation. A student on probation may take no more than 16 credits per semester. Probation is lifted when the cumulative GPA rises to 2.0.

If your overall GPA remains above a 2.0 but your one-semester GPA is below a 2.0, you are placed on academic warning.

See the Undergraduate Catalog (linked above) for full requirements and conditions leading to academic warning, probation, and suspension.

REGISTRATION FOR CLASSES

Course Request (pre-registration) is a period in the middle of each semester during which students enrolled currently may select classes for the following semester. Prior to, or during, course request, you should plan your schedule, consult with your advisor, and utilize course request in Hokie SPA.

COURSE LOADS

A student is classified as "full-time" if enrolled for 12 credit hours in fall and spring semesters and/or 6 credits during a summer session. A normal course load is 15-17 hours per semester. Overloads (more than 19 hours per semester, 9 each summer session) require permission of your Academic Dean's office. Unless such permission has been obtained in advance, you will not be able to add more than the maximum number of credits per semester/summer session.

LATE ADDS

Adding a course to your schedule after the deadline requires permission of your Academic Dean.

CLASS LEVEL

A student must have received credit for at least 30 hours to be classified as a sophomore, at least 60 hours to be classified as a junior, and at least 90 hours to be classified as a senior.

ENROLLMENT IN GRADUATE COURSES

With permission of the instructor, chemistry majors may enroll in 5000-level chemistry courses. Chemistry majors wishing to take 5000-level courses in other departments must have the approval of the instructor and the Dean of the Graduate School.

PASS-FAIL GRADE OPTIONS

Students may take certain courses on a pass-fail basis, according to the following regulations:

- 1. No Curriculum for Liberal Education requirements or departmental requirements may be taken under the pass-fail option for chemistry majors.**
2. Minimum credit hours already passed on graded courses must equal 30 with a minimum GPA = 2.50. (Does not apply for courses offered only on a pass-fail basis.)
3. Maximum number of pass-fail credits allowed = 10% of the requirements for graduation taken at Virginia Tech. For example, if a student takes 120 credits at Virginia Tech, 12 hours may be taken Pass-Fail. If a student takes only 90 credit hours at Virginia Tech (with 30 transfer credits), then only 9 (10% of 90) credits may be taken Pass-Fail.
4. For courses taken pass-fail, P or F is recorded on the student's transcript and credit is given if the grade is P. If the course is failed, the "F" is considered as an "F" received under the "A-F" grading system and is included in calculation of the GPA.
5. Pass-fail courses are normally non-transferable to other institutions.
6. No more than 2 courses may be taken pass-fail in any semester unless courses are offered only pass-fail.

COURSE WITHDRAWAL POLICY

Students may drop courses prior to the drop deadline and the course is removed from your transcript. The drop deadline is announced in each semester's Timetable. A maximum of three (3) courses may be dropped beyond the normal drop deadline date during a student's academic career at Virginia Tech, subject to the following stipulations:

1. Students must formally request to withdraw from a course **by the last day of classes** in that academic term.
2. Courses from which a student withdraws under the terms of this policy will appear on their transcript with a W. The W signifies that this policy was invoked; the reasons for its use are the (private) responsibility of the student.
3. A student's decision to invoke this policy is irrevocable and unappealable.
4. Withdrawals may not be employed to reduce or obviate any penalty otherwise accruing to students under the University Honor System.
5. Students may request withdrawal from any course, irrespective of the grade earned up to the point of the request.
6. To withdraw from a course, you must fill out a Course Withdrawal Form available from the College of Science administrative office or from <http://www.science.vt.edu/student/forms/cw.pdf>. The form must be signed by you, your advisor, and your academic dean.

REPEATED AND DUPLICATED COURSES

A course that partially or wholly duplicates another (already taken) course does not count toward graduation. Duplication of two courses does not necessarily mean that they are equivalent; rather, it means that there is sufficient material overlap that credit is not allowed for both. No credit will be given toward graduation for duplicated courses nor may duplicated courses be used for GPA enhancement, unless the grade in the course already taken is a C- or less. Students may repeat courses in which they received grades of C- or below. Both grades stay on the record and figure into the overall and in-major GPA, but the course hours count only once toward graduation. Transcripts will display all hours attempted whether or not they count toward graduation.

TRANSFER CREDIT

Students transferring to Virginia Tech from a community college may transfer as many as 60 credits. Those who transfer from a four-year college have no such limitation. However, all students graduating from Virginia Tech must complete at least 27 hours in residence. A student must take at least 27 of their last 45 hours at Virginia Tech. Also, chemistry majors and minors must take at least 25% of the required chemistry courses at Virginia Tech.

More information is available online at the University Registrar's website: <http://www.registrar.vt.edu>. Transfer students should also review the information in the online Transfer Guide: (<http://www.tranguide.registrar.vt.edu/>).

Students frequently wish to take summer school courses at other institutions for transfer back to Virginia Tech. The student should contact the college or university they wish to attend to determine what courses will be offered. An "Authorization to Take Courses Elsewhere" form should be obtained from the student's primary major's academic dean's office. For students whose (primary) major is chemistry, the form may be found in the College of Science's administrative office or from <http://www.science.vt.edu/student/forms/index.html>. The form must be returned to the Dean's office at least three weeks before matriculation at the other institution. Students who wait until the last part of the Spring semester to file this form may experience some delay. The transcript evaluator will determine whether the desired courses will transfer as expected, and approved copies are sent to the student and the student's academic advisor. After the courses are completed, the student must request that an official transcript be sent to the University Registrar at Virginia Tech.

DOUBLE MAJORS and SECOND DEGREES

Students who complete the requirements for two majors within the same academic term are considered Double Majors. Students receive a diploma for the primary major (degree) and a double major certificate for the secondary major (double major).

Students may complete the requirements for a Second Degree in a different academic term. Students pursuing a Second Degree must complete an additional 30 credits over the minimum required for their first degree. Students will receive a separate diploma for each degree.

You should indicate on your Application for Degree on Hokie SPA if your secondary major should be a double major or a second degree.

MINORS

Any department that offers a major may offer a minor. If you desire a minor in a particular subject, contact the appropriate department for their requirements or ask your advisor. Note that Majors and Minors are supposed to be added before senior year.

GRADUATION

You should apply for your Degree on Hokie Spa during your junior year. You may then generate a Degree Audit Report System (DARS) report in Hokie Spa to review your record to see what requirements remain to be completed for graduation. Applying for your degree early ensures that you will have time to take courses that you may have overlooked, and it allows you and your advisor to correct the Registrar's analysis if errors are present. Finally, you should be advised that the Registrar's graduation analysis is not a binding contract. Do not assume that you are excused from a required course on the basis of error in DARS; the Registrar will eventually find the mistake and you will not graduate.

CURRICULUM FOR LIBERAL EDUCATION (CLE) & UNIVERSITY AND COLLEGE OF SCIENCE REQUIREMENTS

1. No more than 60 hours in the major may be counted towards the total number of hours required for graduation.
2. Successful completion of English 1105 and 1106, or 1204H. Students who receive Advanced Standing (with credit) for 1105 take only 1106.
3. Proficiency in a foreign language equivalent to one year of university instruction. This requirement can be met in several ways:
 - 3.1. Completing the third year (Level III) of a language in high school.
 - 3.2. Completing two years each of two different foreign languages in high school (for College of Science majors).
 - 3.3. Completing the 1106 course in Chinese, French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian, or Spanish, including any prerequisites.
NOTE: Students who have not completed foreign language requirements in high school may not count these hours toward the 120 required for graduation.
 - 3.4. Passing an oral examination in a language not taught at Virginia Tech.
 - 3.5. Documenting that English is not your primary language (see Department of Foreign Languages & Literatures for obtaining documentation).
4. Six (6) hours of humanities (Area 2).
5. Six (6) hours of social sciences (Area 3).
6. Three (3) hours of fine arts (Area 6). (The College of Science at Virginia Tech requires three credits for Area 6; some colleges within the university have different requirements.)
7. Three (3) hours: Critical Issues in a Global Context (Area 7). Some Area 7 courses may also count for Areas 2 or 3.
8. No course may be used to fulfill more than one core area, except for courses that list Area 7 and another area. (Some courses are listed as counting as Area 2 or Area 6. These are either/or choices. However, a course listed as counting towards Area 2 and Area 7 may be counted towards both.)
9. Virginia Tech's Curriculum for Liberal Education yearly guides are available online:
<http://www.cle.prov.vt.edu/>.

The Honors Program

The goal of University Honors is to provide the student enhanced access to a great faculty and the tools to create an education second to no other among the nation's elite.

The Chemistry Department is an active participant in the University Honors Program. We offer honors sections of several lecture courses to all students of the University, and we encourage our majors who are eligible to join the Honors Program and participate fully.

Additional information on Honors eligibility can found on Virginia Tech's University Honors website, <http://www.univhonors.vt.edu/>, or by calling the Honors Program office for more information or to schedule an appointment – (540) 231-4591.

Miscellaneous Student Information

UNDERGRADUATE RESEARCH (CHEM 4994)

Chemistry majors are strongly encouraged to undertake a research project in collaboration with at least one faculty member. Credit for this activity is obtained by enrolling in CHEM 4994 for those semesters (potentially including summers) in which the work is to be performed. Chemistry faculty can suggest either short-term (one semester) or long-term projects; in every case, undergraduate research projects are designed to meet the individual interests and needs of the student. An interested student should consult with a prospective research mentor at least several weeks prior to the academic term in which s/he wants to register for undergraduate research. The student and research mentor must complete the "Undergraduate Research" form, which is available on the College of Science forms web page (cos.vt.edu). Students need a minimum 2.0 in-major GPA, a minimum 2.5 overall GPA, and a minimum of 28 credit hours completed at Virginia Tech to enroll in CHEM 4994.

ALPHA CHI SIGMA & CHEMISTRY CLUB

There are two student groups affiliated with the Chemistry Department at Virginia Tech: Alpha Chi Sigma, the co-ed professional chemistry fraternity; and the Chemistry Club, a student affiliate chapter of the American Chemical Society. All chemistry majors are encouraged to join one and/or both of these groups. Activities include meetings, socials, tutoring, and hosting "illusion shows" and an end-of-the-year picnic for the department. For further information, please visit

http://www.chem.vt.edu/general.php?page=orgs_ugrag

AFTER GRADUATION?

After receiving the B.S. or B.A. degree in chemistry, some students continue their education in professional or graduate school, and some take an entry-level job in chemistry or a related discipline.

Professional School Opportunities. Chemistry graduates may choose to pursue careers in dentistry, law, medicine, optometry, pharmacy, veterinary medicine, etc. Your academic advisor can direct you to numerous sources of information concerning professional school.

Graduate School. Many companies prefer to hire scientists with advanced degrees.

B.S. and B.A. chemistry majors are qualified to enter graduate school and pursue the M.S. or Ph.D. degree in a surprisingly large number of areas, some of which we have listed here:

chemistry	biochemistry	chemical engineering
textiles	paper chemistry	environmental engineering
food science	toxicology	medicinal chemistry
pharmacology	pharmacy	materials engineering
polymer chemistry	virology	forensic chemistry
oceanography	clinical chemistry	secondary education

Your academic advisor should be able to advise you concerning graduate school, particularly in chemistry. If you are interested in an area unfamiliar to your advisor, s/he should be able to direct you to someone knowledgeable. Students wishing to go to graduate school should plan to take the Graduate Record Exam (GRE) in the fall of their senior year and should complete their applications in mid-January.

Employment. Finding a job requires work, perseverance, and a little luck, so you should plan to spend considerable time and effort in your search. If you sit back and wait for employers to come to you, you will not find a job! There are three primary sources of help for students interested in finding employment immediately after graduation: your academic advisor, the departmental career advisor, and the Office of Career Services, <http://www.career.vt.edu/>. Career Services offers a variety of useful options such as mock interviews, resumé critique sessions, group meetings and seminars, and on-campus interviewing opportunities.

UNIVERSITY COUNSELING CENTER (www.ucc.vt.edu)

The Cook Counseling Center offers short-term individual, couples, and group counseling for a variety of concerns. Students come in for counseling to help them with issues such as stress, depression, anxiety, loneliness, sexual concerns, academic motivation, and relationship problems.

The Cook Counseling Center office and phonenumber are open Monday-Friday, 8:00 am to 5:00 pm, at 540-231-6557. If you need emergency counseling outside normal business hours, assistance is available by calling 540-231-6444.

STUDENT SUCCESS CENTER (<http://www.studentsuccess.vt.edu/>)

The Student Success Center at Virginia Tech offers free academic support – such as tutoring and a wide variety of seminars and information sessions (including seminars on time management, honing test-taking and note-taking skills, and how to stay focused through the semester) – to undergraduate students.

VIRGINIA TECH POLICE DEPARTMENT (www.police.vt.edu)

The Virginia Tech Police Department is nationally accredited by the Commission on Accreditation for Law Enforcement Agencies Incorporated. Our police department strives to enhance the safety and quality of life for students, faculty, staff and visitors through effective law enforcement and proactive crime prevention in partnership with the university community.

Several programs are offered by the department, free of charge, to Virginia Tech students. Programs include the Student's Police Academy, Self-Defense/Rape Aggression Defense System course, and VT C-CERT (Campus Community Emergency Response Team) training. Please visit the department's website (www.police.vt.edu) for more information.

SAFE RIDE

The police department also sponsors a nighttime campus safety escort service known as Safe Ride. Safe Ride operates from dusk until dawn and provides transportation or a walking escort upon request. To use this service, call (540) 231-SAFE.

Undergraduate Courses (CHEM)

1004: FIRST YEAR EXPERIENCE IN CHEM

Orientation to the Chemistry Department and to the discipline of chemistry for chemistry majors and for individuals considering CHEM as a major, including transfer students. Resources for success, both generally as a college student and specifically as a chemistry major. Opportunities for mentoring, individual research and community involvement across the university and within the Chemistry Department. Exploration of career pathways for chemistry majors. Interconnections among professional practice, disciplinary progress, accepted standards for ethical use of information, principles of diversity and inclusion, and individual or personal value systems. Scientific communication, professional networking, and chemistry in the public eye.

1015-1016: INTRODUCTION TO CHEMISTRY

For students enrolled in curricula other than science or engineering. Chemical principles applied to material, environmental, and life sciences. (Duplicates 1035-1036.) (3H,3C)

1025-1026: INTRODUCTION TO CHEMISTRY LABORATORY

Accompanies 1015-1016, where lab work is required in a student's curriculum. Must be taken concurrently and in phase with lecture sequence, 1015-1016. In both semesters, experiments illustrate principles covered in lecture. (Duplicates 1045-1046.) Co: 1015 for 1025; 1016 for 1026. (3L,1C)

1035-1036: GENERAL CHEMISTRY

Principles of the science, character of the elements and their more important compounds, solution of chemical problems, and important applications. (Duplicates 1015-1016.) (3H,3C)

1045-1046: GENERAL CHEMISTRY LAB

Accompanies 1035-1036. Selected experiments illustrate principles taught in lecture. (Duplicates 1025-1026). Co: 1035 for 1045; 1036 for 1046. (3L,1C)

1055-1056: GENERAL CHEMISTRY FOR CHEMISTRY MAJORS

In depth treatment of chemical bonding, thermodynamics, chemical equilibrium, reaction kinetics, descriptive chemistry of the elements, acid-base chemistry, chemistry of gases, liquids and solids, and other topics. This class is restricted to chemistry majors. Co: 1065 for 1055; 1066, 1066 for 1056. (4H,4C)

1055H-1056H: HONORS GENERAL CHEM FOR MAJORS

More in-depth treatment of chemical bonding, thermodynamics, chemical equilibrium, reaction kinetics, descriptive chemistry of the elements, acid-base chemistry, chemistry of gases, liquids and solids, and other topics. This class is restricted to chemistry majors. Co: 1065 for 1055H; 1066, 1066 for 1056H. (4H,4C)

1065-1066: GENERAL CHEMISTRY FOR CHEMISTRY MAJORS LAB

Accompanies 1055-1056. Selected experiments illustrate principles taught in lecture. This class is restricted to chemistry majors. Co: 1055 for 1065; 1056 for 1066. (3L,1C)

2114: ANALYTICAL CHEMISTRY

A first course in analytical chemistry. Topics covered include volumetric and gravimetric analysis, and elementary spectroscopy. Pre: 1036 or 1056. Co: 2124. (3H,3C)

2124: ANALYTICAL CHEMISTRY LABORATORY TECHNIQUES AND PRACTICE

Practical introduction to wet methods of quantitative chemical analysis based on fundamental chemical principles. CHEM 2124 may be substituted for CHEM 3124. Pre: (1046 or 1066), 2114. Co: 2114. (3L,1C)

2154: ANALYTICAL CHEMISTRY FOR CHEMISTRY MAJORS

A one-semester course in analytical chemistry emphasizing the principles of equilibrium with examples from acid-base, complexation, solubility, and redox chemistry. The course also introduces the principles of spectroscopic, electrochemical, and chromatographic instrumentation. Pre: 1036 or 1036H or 1056 or 1056H. Co: 2164. 4H,4C)

2164: ANALYTICAL CHEMISTRY FOR CHEMISTRY MAJORS LAB

A one-semester laboratory course in analytical chemistry that provides practical training in wet chemical methods, atomic and molecular spectroscopy, electrochemistry, and separations. Pre: 1046 or 1066. Co: 2154. (3L,1C)

2424: DESCRIPTIVE INORGANIC CHEMISTRY

Application of fundamental principles in a systematic study of bonding and reactivity of the elements and their compounds. Pre: 1036 or 1056. (3H,3C)

2514: SURVEY OF ORGANIC CHEMISTRY

Short course in fundamentals of organic chemistry with emphasis on nomenclature, isomerism, and properties of organic compounds. Compounds of importance to biology and biochemistry stressed. (Prior credit for 2535 precludes credit for this course.) One year of Chemistry required. (3H,3C)

2535-2536: ORGANIC CHEMISTRY

Structure, stereochemistry, reactions, and synthesis of organic compounds. Pre: 1036 or 1056 for 2535; 2535 or 2565 for 2536. (3H,3C)

2545-2546: ORGANIC CHEMISTRY LABORATORY

The laboratory accompanies lectures in organic chemistry 2535 and 2536. Pre: 1046 or 1066 for 2545; 2545, (2536 or 2566) for 2546. Co: 2535 or 2565 for 2545; 2536 for 2546. (3L,1C)

2555-2556: ORGANIC SYNTHESIS AND TECHNIQUES LAB

Synthesis and characterization of organic compounds using modern laboratory techniques. II Pre: 2566 for 2555; 2555 for 2556. (6L,2C)

2565-2566: PRINCIPLES OF ORGANIC CHEMISTRY

Organic chemistry for chemistry majors. Structure and reactions of organic compounds, with emphasis on fundamental principles, theories, synthesis, and reaction mechanisms. The subject matter partially duplicates that of 2535-2536; no credit will be given for the duplicated courses. Pre: 1036 or 1056 for 2565; 2565 for 2566. (3H,3C)

2565H-2566H: PRINCIPLES ORG CHEM

More in-depth treatment of organic chemistry for chemistry majors. Structure and reactions of organic compounds, with emphasis on fundamental principles, theories, synthesis, and reaction mechanisms. The subject matter partially duplicates that of 2535-2536; no credit will be given for the duplicated courses. (3H,3C)

2974: INDEPENDENT STUDY

Variable credit course.

2984: SPECIAL STUDY

Variable credit course.

3615-3616: PHYSICAL CHEMISTRY

Principles of thermodynamics, kinetics, and quantum mechanics applied to chemical equilibria, reactivity, and structure. Partially duplicates 4615, cannot receive credit for both 3615 and 4615. I,II,III. Pre: (1036 or 1056), PHYS 2306, MATH 2224 for 3615; 3615, 1036, MATH 2214, (PHYS 2306 or PHYS 2176) for 3616. (3H,3C)

3615H-3616H: HONORS PHYSICAL CHEMISTRY

More in-depth study of principles of thermodynamics, kinetics, and quantum mechanics as applied to chemical equilibria, reactivity, and structure. Partially duplicates 4615, cannot receive credit for both 3615H and 4615. 3615H requires additional work; consult the instructor. I,II,III Pre: 1036, (PHYS 2306 or PHYS 2176) for 3615H; 3615, 1036, MATH 2214, (PHYS 2306 or PHYS 2176) for 3616H. (3H,3C)

3625-3626: PHYSICAL CHEMISTRY LABORATORY

Laboratory study of selected physico-chemical principles and methods. Data acquisition, data analysis, and report writing are stressed. I,II Pre: 3615 or 4615 for 3625; 3616, 3625, and 4014 for 3626. (3L,1C)

4014: SURVEY OF CHEMICAL LITERATURE

Use of the chemical literature as an aid to professional activities. I,II (1H,1C)

4074 (MSE 4544): LABORATORY IN POLYMER SCIENCE

Experimental techniques used in the synthesis of various linear polymers, copolymers, and crosslinked networks. Determination of polymer molecular weights and molecular weight distribution. Methods used in the thermal, mechanical, and morphological characterization of polymeric systems. Graduate students in chemistry, P/F only. Pre: 3616, 4534. (1H,3L,2C)

4114: INSTRUMENTAL ANALYSIS

Principles of instrumental methods including data analysis, phase equilibrium, spectroscopy, and electrochemistry. Applications of modern instrumentation to chemical analyses using chromatography, electrophoresis, atomic and molecular spectroscopy, potentiometry, and voltammetry. Note: Graduate students will not be expected to take the instrumental analysis lab 4124. Pre: 3616. (3H,3C)

4114H: HONORS INSTRUMENTAL ANALYSIS

More in-depth treatment of principles of instrumental methods including data analysis, phase equilibrium, spectroscopy, and electrochemistry. Applications of modern instrumentation to chemical analyses using chromatography, electrophoresis, atomic and molecular spectroscopy, potentiometry, and voltammetry. Note: Graduate students will not be expected to take the lab 4124. Pre: 3616. (3H,3C)

4124: INSTRUMENTAL ANALYSIS LABORATORY

Hands-on experience with modern instrumental methods of analysis. Experiments use spectroscopy, electrochemistry, and separations. Pre: 4114. (3L,1C)

4404: PHYSICAL INORGANIC CHEMISTRY

A study of spectroscopic, bonding, and structural properties of inorganic compounds. I Pre: CHEM 2424, 3616. (3H,3C)

4414: INORGANIC CHEMISTRY LAB

Synthesis and characterization of inorganic compounds using modern laboratory techniques. II Pre: CHEM 2424, 3616, and 4404. (6L,2C)

4514: GREEN CHEMISTRY

Green chemistry applies the principles of *prevention* of toxic and hazardous waste, and energy efficiency to real world chemical products and processes. Emphasis is on case studies, problem solving, and life cycle analysis. Pre: 2536 or 2566 (3H,3C).

4524: IDENTIFICATION OF ORGANIC COMPOUNDS

Structure determination of organic compounds by spectroscopic methods, with an emphasis on mass spectrometry and nuclear magnetic resonance. Course will emphasize problem-solving skills. I. Pre: (2536 or 2566), (3616 or 4616). (3H,3C)

4534: ORGANIC CHEMISTRY OF POLYMERS

Structure, synthesis, and basic characteristics of the major classes of polymerization reactions including step-growth (condensation) and chain growth (addition), free radical, and ionic mechanisms. Pre: 2536 or 2566. (3H,3C)

4554: DRUG CHEMISTRY

Structure, synthesis, and physiological effects of major classes of pharmaceutical agents including CNS depressants and stimulants, analgesics, anesthetics, cardiovascular agents, chemotherapeutic drugs, and oral contraceptives. II Pre: 2536 or 2566. (3H,3C)

4615-4616: PHYSICAL CHEMISTRY FOR THE LIFE SCIENCES

Principles of thermodynamics, chemical kinetics, and chemical bonding for students in the life sciences. 4615: Laws and applications of thermodynamics. 4616: Chemical kinetics and chemical bonding including spectroscopy. Partly duplicates 3615, cannot receive credit for 3615 and 4615. 4615 Pre: (4615) CHEM 1036 or 1056 or 1056H, MATH 1206 or 2015, and PHYS 2206 or 2306). 4616 Pre: CHEM 1036 or 1056 or 1056H, MATH 2016 or 2224 or 2214, and PHYS 2206 or 2306. (3H,3C)

4634 (MSE 4534): POLYMER AND SURFACE CHEMISTRY

Physical chemical fundamentals of polymers and surfaces including adhesives and sealants. II Pre: 3615 or 4615. (3H,3C)

4654: ADHESIVE AND SEALANT SCIENCE

Introduction to the fundamental and practical aspects of adhesives and sealants. Emphasis on synthesis of polymeric adhesive and sealant molecules, determination of physical properties of adhesives and sealants, chemical and physical characteristics of adherend surfaces, and mechanical behavior and durability of bonded systems – including metals, composites, polymers, and wood. I Pre: (3615 or 4615). (3H,3C)

4734 (CSES 4734) (ENSC 4734): ENVIRONMENTAL SOIL CHEMISTRY

Chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibria, sorption phenomena, ion exchange processes, reaction kinetics, redox reactions, and acidity and salinity processes. Pre: CSES 3114, CSES 3124, CHEM 2514 or CHEM 2535, CHEM 3114, MATH 2015. (3H,3C) I.

4754 (CSES 4754) (ENSC 4754): INSTRUMENTAL ANALYSIS FOR AGRICULTURAL AND ENVIRONMENTAL SCIENCES

Theory and principles of common analytical instruments and their applications to agriculture and environmental science research. Topics include atomic absorption and emission spectroscopy, spectrophotometric methods (UV, visible, luminescence, and automation), chromatography, ion-selective electrodes, and microwave digestion. Infrared spectroscopy, atomic ratio and molecular mass spectroscopy, nuclear magnetic resonance will also be included. Provides hands-on experience with modern analytical instruments. Prerequisites or graduate standing required. II Pre: CHEM 2114, 2124 or CHEM 2154, 2164 or CSES 3114, 3124). (3H,3L,4C)

4964: FIELD STUDY

Pass/Fail only. Variable credit course.

4974: INDEPENDENT STUDY

Variable credit course.

4984: SPECIAL STUDY: Physical Organic Chemistry

4984: SPECIAL STUDY: Bioorganic Chemistry

4984: SPECIAL STUDY

Variable credit course. X-grade allowed.

4994: UNDERGRADUATE RESEARCH

Variable credit course.

4994H: HONORS UNDERGRADUATE RESEARCH

Variable credit course.
